

# CHOOSING THE BEST MIELE VACUUM

## ABOUT US

*“At **All About Vacuums**, we sell stuff that actually works.”*

This belief has remained true since the day we opened our doors. **All About Vacuums** is not an ordinary vacuum company. As a family-owned and operated business, we combine expertise in the field with 35 years of service to our local community and customers across the nation. **All About Vacuums** offers a wide range of machines that always match Internet prices. But more importantly, our team’s unparalleled customer service gets to the heart of what drives your decision. Our personalized approach ensures you choose the right vacuum without worrisome buyer’s remorse.

## ABOUT MIELE VACUUMS

As the translation implies, Miele vacuums are “forever better.” When choosing a vacuum, you need a brand you can trust – that’s why **All About Vacuums** recommends Miele for all your vacuuming needs.

A true leader in the field, Miele has consistently produced premium products since 1899. With all vacuums backed by a Good Housekeeping Seal, Miele is a dependable company that is well-regarded by customers and the wider industry. **All About Vacuums** knows Miele is at the top of the pack, and that’s why we want to make sure you choose the right model.

# SELECTING THE RIGHT VACUUM FOR YOUR HOME AND LIFESTYLE

Picking the right vacuum shouldn't be overwhelming. Let us make your decision easier with a few helpful guidelines. When visiting the **All About Vacuums** store, the team asks specific questions that help to reveal which vacuum you need. We are replicating this process below so you can enjoy the same personalized experience you receive on-site. Here are our recommendations.

## ASTHMA AND ALLERGY SUFFERERS

Low-quality vacuums simply circulate rather than absorb debris. But those who suffer from allergies and asthma need relief, not more dust. So why waste time with vacuums that blow around more dirt than they inhale?

Miele's Air Clean Sealed System technology ensures that dirt stays in the vacuum, not in the room. All Miele vacuums come with High Efficiency Particulate Air (HEPA) bags, which prevent dust emissions from the vacuum exhaust so you are not breathing in contaminated air. Some models also include HEPA filters, and those that do not can be purchased as an additional enhancement to your vacuum.

Capturing and containing almost 99.99% of allergens, we recommend those suffering from allergies choose the **Miele Complete C3 Marin** canister vacuum. Suitable for a variety of locations, the Complete C3 Marin comes with an Electro Comfort Electrobrush for cleaning low to medium-pile carpeting and a Parquet Twister Floorbrush for cleaning smooth surfaces. The telescopic, stainless steel wand and long electrical cord, with automatic rewind, provide an impressive cleaning radius of 36 feet.

Allergens are not just found on the floor. Miele vacuums offer a variety of attachments so you can remove dust in hard-to-reach places. Miele's Complete C3 Marin features several handy accessories, including a dusting brush, upholstery tool, and crevice nozzle. Choosing the vacuum that best absorbs aggravating particles can provide much-needed comfort to allergy and asthma sufferers.

## CHILDREN AND PET LOVERS

As any dog or cat owner knows, pet hair can be difficult to remove from carpeting and hardwood floors. Both children and pets are constantly crawling on the floor and exploring. Make sure the ground is clean so children don't inhale and dirt or mold into their little lungs.

**All About Vacuums** recommends the [Miele U1 Cat&Dog - SHBE0](#) upright vacuum for environments with small mischief-makers.

With 1,200 watts of suction power, this vacuum captures stubborn pet hair and particles throughout your home. A turbobrush and odor filter ensure that your ground not only looks great, but smells great too. In a house with kids, vacuuming regularly is essential. Don't take any chances on the health of your children, or sacrifice a clean home for the sake of your furry friend.

## CARPETED FLOORS

Carpeting provides many benefits, such as warmth and sound absorption. But carpeting also requires more maintenance and attention than hardwood floors. Miele vacuums are well-equipped to clean even the thickest, most luxurious carpets.

For a clean carpet, we recommend the [Miele Complete C3 Kona](#) canister vacuum. With 6 variable power settings and a 33-foot cleaning radius, the Kona is a versatile, high-performance selection.

The silence motor, lightweight skeletal construction, and deluxe ergonomic handle with brush head controls ensure functionality with ease. The Miele Complete C3 Kona works especially well for medium and high-pile carpeting.

Carpets are a comfortable addition to any household, but they require high-functioning vacuums to stay hygienic for your family. We are confident Miele vacuums are up to the task.

## HARDWOOD FLOORS

Hardwood floors require a gentler touch than carpets. The surface is smoother, and there are less layers to penetrate. But this does not mean you can use a low-quality device and expect a high-quality clean. If you have hardwood floors, we recommend the excellent **Miele Compact C1 Pure Suction** canister vacuum.

Featuring an AirClean sealed system and a telescopic stainless steel wand, this vacuum smoothly glides over hardwood floors and keeps the air fresh at the same time. While it is recommended for hardwood floors, the Compact C1 Pure Suction tackles area rugs and short-pile carpeting as well. Operating on 1200 watts with a 29.5-foot radius, this vacuum does not sacrifice power in eliminating the dirt on your floor.

## USE IN SMALL SPACES

If are short on space but still want to make sure your floors are impeccably clean, choose the **Miele Swing H1 Quickstep PowerLine - SAA00**. This high-suction stick vacuum cleaner is an efficient device with a 9-meter operating radius and quick-release power cord. Lightweight and easy to maneuver, this vacuum has an AirClean filter and 1,000-watt suction power that offer a great clean in a compact package.

The last thing anyone in tight quarters needs is a clunky vacuum that is difficult to put away. The Miele Swing H1 Quickstep Powerline takes up minimal storage room, meaning you can make the most of your location.

## HANDS-FREE OPERATION

The intelligent **Miele Scout RX1 Red - SJQL0** robot vacuum cleaner uses cutting-edge technology to give your rooms a hands-free clean. Boasting a Smart Navigation system, the device reaches even the toughest nooks and crannies through a combination of sweeping, brushing, and vacuuming. With Advanced Corner Cleaning and an extremely long battery life, this robot vacuum can clean rooms of all size.

The dependable Timer feature means you don't even have to be home to vacuum your house. The Furniture Protection Technology prevents the device from colliding into obstacles, so it can focus on successfully tidying your floors. Good things come in small packages - choose the modern Miele Scout robot vacuum for a simple, fuss-free clean.

## PREMIUM PERFORMANCE

If you are looking for a vacuum with an all-around premium performance, look no further than the **Miele Complete C3 Brilliant PowerLine** canister vacuum. First-rate features include a comfort handle with its own integrated controls, a park system with automatic switch-off, LED lighting, and maximum air hygiene with the HEPA clean filter.

Switch the Miele Complete C3 Brilliant PowerLine to the unique silent setting, so you don't have to worry about disturbing anyone else in the house. Vacuum in style with the exclusive Bronze Pearl Finish in matte lacquer with chrome trim. With castor wheels and three-point maneuverability, this agile device is gentle on floors but tough on dirt. The Miele Complete C3 Brilliant PowerLine is an exceptional long-term investment in keeping your home spotless.

Hands-Free Operation	Miele Scout RX1 Red - SJQL0 Robot Vacuum
Premium Performance	Miele Complete C3 Brilliant PowerLine Canister Vacuum

# TIPS FOR VACUUMING

Now that you know which Miele vacuum best suits your needs, make sure you are vacuuming effectively. Here are some quick tips to consider:

- Follow a regular vacuuming schedule. Your vacuum is only a good investment if you make the most of it, so be sure to use the machine regularly to keep your house as clean as possible.
- Change the bag or empty the canister consistently. The vacuum cannot easily pick up new debris if the filter is obstructed. As a rule, change your bag once it is over 75% full.
- Remove objects from the floor prior to vacuuming. If you clear space ahead of time you'll make it easier to travel when using the vacuum, and you won't risk small objects being picked up or damaged by the machine.
- If you have a HEPA vacuum, keep it running a few minutes after you finish cleaning. This will give the vacuum more time to absorb dust in the air before it lands back on the floor.

- Take advantage of the attachments on your vacuum for especially hard-to-reach places. Vacuums don't only clean your floors – with the right attachment you can clean furniture and other parts of your room all at the same time.
- Dust before you vacuum. It sounds obvious, but you don't want dust to fall back onto your clean surfaces.
- Make multiple passes of the carpet or floor to make sure you are fully catching the dirt. This may not be necessary when vacuuming an area rug – however, you should vacuum the center of the area rug more than the outside so you don't damage the edging.
- Try vacuuming carpets more slowly if you notice a lot of wear and tear. This will minimize potential damage to the carpet.
- Choose the right setting based on the height of the surface you are vacuuming – hardwood and carpets have different heights requirements to ensure the best results.

# SHIPPING AND RETURNS

At **All About Vacuums**, we want you to be 100% satisfied with your purchase. The number one reason customers return a vacuum is because they bought the wrong type for the problem they were looking to address. If this is the reason for your dissatisfaction, give us a call and we can point you in a better direction. Should your vacuum become damaged, call us or visit the store - we can guide you and facilitate the repairs on-site. We give you honest advice and try to solve your problem at a lower cost before you buy a new model.

We offer free shipping on orders over \$50, and free overnight shipping for Miele vacuums. We accept returns within 30 days of invoicing. See [our website](#) for complete details regarding our terms and conditions.

# IN CONCLUSION

A quality vacuum is an investment in the health of your family and the beauty of your home. The right vacuum makes your life easier, and is a pleasure to operate. **All About Vacuums** highly recommends Miele vacuums for their quality, usability, and consistently outstanding performance. If you have any questions or concerns, or would like to learn more about a specific model, please give us a call. We really are here to help you. At **All About Vacuums**, we sell stuff that actually works -your satisfaction is our number one priority.
